A Pre-Modified Loan Values (Type P) record is generated for each pool that has pre-modification data for at least one modified loan.

*The LAD weighted average is the weighted average of the difference in months between the original (pre-modified) first scheduled installment date and the modified first scheduled installment date, where a loan has been modified and re-amortized. The difference is weighted by the current period unpaid principal balance of the loan. A given loan participates in this weighted average and the associated quartiles only if the loan was modified.

**Pre-Modified Original Loan Size (OLS) is the value for modified loans of the original loan size (pre-modified OPB) before loan modification. To participate in the pre-modified average original loan size and associated quartiles, a loan must be modified.

Multi Issuer Pool---Issuer Delinquency Record Type L

Only for Multi Issuer Pools--Can be multiple records; one record for each issuer with delinquent loans in a multi issuer pool. If there are no delinquent loans for the reporting period for the pool, there will be no Type L records for the pool. The existing rules for delinquency calculation apply; and; applies only to the Monthly file.

This Record Type is Not applicable to Daily/Weekly
